

Fred Pak is a Windows-based foil printing system that works hand-in-hand with Fred Dispense to simplify unit dose packing. It prints medication details on the header cards and backing foil used to seal medication in blister foil packs.

Fred Pak saves you time and money by preventing double handling of patient records and preventing double dispensing, thanks to full integration with Fred Dispense. Your customers have peace of mind of knowing that their pre-packed medications are accurate.

PUTTING PATIENTS IN THE KNOW

PUTTING CUSTOMERS FIRST

- Real-time updates through Fred Dispense mean that your patient records are always accurate
- Photo IDs on foils help to ensure that the right patients receive the right medication, especially important in nursing homes
- Patient details are printed on both the foil and label as an additional safety measure to help ensure patients are taking the right medications
- Signing charts can be printed

SAVING TIME

- Your customer's dispense and packing profile are linked, so that you can update their profile without double entry
- No double keying of patient, medication or medicare details
- Up to the minute patient medication profile information

FLEXIBLE AND EASY TO USE

- Caters for various packing configurations such as multi-dose packing or seven day unit packing
- Covers weekly, fortnightly and monthly packing cycles as well as PRN Packing
- Filters printing by patient or nursing home
- Set days, daily, alternate day, every 3rd day, monthly, bi-monthly, 6 monthly, yearly dosage frequencies are all catered for
- Prints to Cold Seal
- Runs on multiple computers at the same time
- Supports various packing formats including Medicopak, Websterpak, Baxter, Nomad, ATC Fill, J V Medi and Active Care
